BONAFIDE CERTIFICATE

This is to Certify that this Mini Project work entitled “**SECURED ONLINE VOTING SYSTEM USING FACE RECOGNITION**” is the bonafide work of **T.DEEPIKA(Y17IT104), SK.HAFSA(Y17IT095), Y.DEVI(Y17IT119)** who carried the work under my supervision, and submitted in the partial fulfillment of the requirements to **IT-356, OOAD LAB** during the year 2020-2021.

Mr. M.Siddardha Kumar

Lecturer In-Charge

Dr. A.Sri Krishna

Prof.& HOD, Dept.IT

ACKNOWLEDGEMENT

From the idea to the act, from the conception to reality, from the emotion to the response, from the desire to the spasm, we led by those about whom to write all words seem meek.

We are very much thankful to **Dr.A.Sudhakar, Principal of R.V.R. & J.C College of Engineering**, Guntur, for allowing us to work on this project.

We express our sincere thanks to **Dr.A.Sri Krishna, Professor and Head of the Department of Information Technology** for encouraging and support to carry out this project successfully.

We are very glad to express our special thanks to **Mr.M.Siddardha Kumar** who has inspired us to select this project according to our choice and for his valuable advices to work on this project.

This Mini Project wouldn't be completed without the help of my friends, family members and other people who are directly or indirectly connected with this work. I also express my sincere thanks to the Technical and Non-Technical staff and other faculty of the department for their valuable help.

T.DEEPIKA (Y17IT104)

SK.HAFSA (Y17IT095)

Y.DEVI (Y17IT119)

CONTENTS

Acknowledgement

1. Problem Scenario	1
---------------------	---

ANALYSIS

Use case view

2. Identification of Actors.	8
3. Identification of Use cases and sub use cases	10
4. Use case diagram.	17
5. Flow of Events.	19
6. Activity diagram.	26

Logical view

7. Identification of Analysis classes.	32
8. Identify the responsibilities of Classes.	37
9. Use case realizations.	39
10. Sequence diagrams.	41
11. Collaboration diagrams	44
12. Identification of attributes and methods of classes.	48
13. Identification of relationships among classes.	49
14. UML Class diagram.	51
15. UML state chart diagram.	56

Design

16. Designing classes by applying design axioms.	61
17. Refining attributes, methods & relationships.	63

Implementation Diagrams

18. Component Diagram.	66
19. Deployment Diagram.	68
20. References.	78
